A PARTNER ACADEMY IN JOHN TAYLOR MAT  
Headteacher: Mrs M Mincher, Bsc, NPQH

RESILIENT

INNOVATIVE

MINDFUL

EMPLOYABLE

Dear Parent/Guardian,

I am writing to you regarding your child, who is currently studying GCSE Astronomy.

I want to start by acknowledging the effort that your child has put into their studies. It is evident that they have a genuine interest in the subject, and as a result are in line or exceeding their targeted progress. This is wonderful to see, and I send my thanks to you for all of your support in this.

In an effort to provide additional support and resources, we have organised an intervention session for GCSE Astronomy. This session is designed to push our students even further in terms of what they are capable of. This is a voluntary session; however, it would be of benefit for them to attend and get even more from the course.

The first intervention session will take place on **Monday, 6<sup>th</sup> of November, 3:00-3:30pm in C19**. The session will then be every Monday until Christmas. In the sessions we will investigate the more difficult analytical skills that they need in order to maximise their progress in the subject.

Our goal at Kingsmead is to ensure that every student reaches their full potential and succeeds. We cannot wait to see your child progress even further as a result of using these sessions.

If you have any concerns or questions regarding the intervention session, please do not hesitate to contact me at [d.horton@kingsmeadschool.net](mailto:d.horton@kingsmeadschool.net) We appreciate your continued support.

Yours faithfully,

Dr. D. Horton  
GCSE Astronomy Lead Teacher
